

TESTIMONIAL ABOUT PREGNANCY

Despite having Nephropathic Cystinosis, Stephanie is a young mother of two wonderful healthy children. Below is her own testimonial :

- *« My personal experience when I was pregnant was pretty good. I started to have some difficulties toward the end. With my oldest child the labor and delivery was very bad. Doctors didn't know what to expect. I never thought I could have children, let alone two perfectly healthy children. »*
- *« You just need to stay healthy, keep taking your medicine, and don't miss your doctor's appointments. Always make time for your family and never take them for granted. You and your children are miracles. »*
- *« Of course Cystinosis is a very complex disease but we were born with it and now we have to live with it. God doesn't give you more than you can handle. You can do anything anyone else can do. Stay strong and show everybody that you can do this ! »*
